Rogelio Samuel

Software developer

As a software developer, I design, develop, and deliver innovative software products. I specialize in front-end development to enhance user experiences and I possess a strong background in back-end technologies.

Work Experience

Full stack developer @ DrEnvío

JAN 2022 - PRESENT

- Online payment solution with paypal
- integrate services from different carriers like fedex, dhl and ups to quote shipments, generate guides, create recollections and more
- Lead complete functionalities to increase business reach and improve sales.

Front-end developer @ EDteam

SEP 2020 - JAN 2022

- Migration of the company's main product from JavaScript to TypeScript, improving the performance being 80% faster with a modern solution for the information management
- Re implement cart system adding communication between websites, gifts system, orders, payment methods and price calculations
- Be in charge of the fron-tend area in the most important campaign (and others) of the company (black Friday), issues, requirements and iterations was my responsibility

Education

Ing. en sistemas @ Tecnológico de Culiacán

2020 - 2024

Onlie courses @ Platzi

JUNE 2018- JUNE 2022
