- Reactjs - Next.js
- Tailwindcss - ChakraUI
- Graphql - sockets
- Jest - Vitest
- Testing library
- Node.js
- Express.js - Nestjs
- MongoDB - Postgres
- Mongoose - Prisma
- Github Actions

## PROFILE

As a software developer, I design, develop, and deliver innovative software products. I specialize in front-end development to enhance user experiences by creating websites adjusted to the device or capacities of the user. Additionally, I possess a strong background in back-end technologies, allowing me to integrate and optimize end-to-end functionalities seamlessly.

## EXPERIENCE

**Full Stack developer**

DrEnvío, Remote                    January 2022 –  present

Maintenance and development of the different DrEnvio projects, refactoring, online payment solutions, shipping quotes, search systems, connections with external APIs and the contribution of new technologies for scalability and optimization.

- Implement the integration for online payment solutions with PayPal
- integrate services from fedex, dhl and paqueteExpress to quote shipments, generate guides, create recollections and more

**Front-end developer**

Jo Automation Systems, Remote       April 2022 –  December 2022

Development of a platform to manage company operations, session management, relations between entities, implementation of a MUI theme, GraphQL usage and files system.

- Be the front-end lead of the project

**Front-end developer**

EDteam, Remote                    September 2020 –  January 2022

Maintenance and development of the platform built on Nextjs with Javascript and Typescript, alternating, 100% remote, multicultural team and scrum methodology for goals.

- Migration of the education platform from Javascript to Typescript improving the performance being 80% faster, with a better code structure and modern solutions for the information management.
- Re implement cart system adding communication between websites, gifts system, orders, communications with payment methods and price calculations
- Be in charge of the fron-tend area in the most important campaign (and others) of the company (black Friday), issues, requirements and iterations was my responsibility
